

As a nationwide truck driver, it is beneficial to me and the public to have information of any upcoming traffic problems or weather problems in time to decide wether to stop prior to the problem and wait it out, instead of sitting in stopped traffic idling, or subjecting myself and others to dangerous weather conditions. I think anybody or any group that tries to stifle someone elses success, are selfish babies that are afraid they might have to work for the millions of our dollars they are stuffing in their pockets. It's called competition,to you, it's called choice to us. Let's do the right thing and let freedom of choice ring.
